

The Royal Veterinary College University of London

Standard 11 – Outcomes Assessment

Major Deficiency:

The Council on Education expects that 80% or more of each college's graduating senior students sitting for the NAVLE will have passed at the time of graduation. *

*Colleges that do not meet this criterion will be subjected to the following analysis. The Council will calculate a 95% exact binomial confidence interval for the NAVLE scores for colleges whose NAVLE pass rate falls below 80%. Colleges with an upper limit of an exact 95% binomial confidence interval less than 85% for two successive years in which scores are available will be placed on Probationary Accreditation. Colleges with an upper limit of an exact 95% binomial confidence level less than 85% for four successive years in which scores are available will, for cause, be placed on Terminal Accreditation. If no program graduates take the NAVLE, the Council will use other student educational outcomes in assessing compliance with the standard, including those listed in the self-study guidelines.
